Kirstin,

I am dealing with a couple oil spill incidents in ND right now and since last night. If you think that you can modify the workings figure to better distinguish Mogul working and the connection to Sunnyside in that area – precision is not critical but relatively close is good. Let me know and we'll try to connect later.

Allen - you are CC'ed on this email in case I am wrong about the Sunnyside and Mogul/Grand Mogul connections.

I would say that for the most part Larry is right.

The Sunnyside Mine Workings are depicted as green lines. I don't think Sunnyside Gold Corporation mined the Mogul or Grand Mogul. They are all depicted together because I thought/think the workings are interconnected via vertical workings and they are on the same vein system. They are geologically connected on the same vein system. I think they are physically connected by stopes? Politically they are probably not the same. I am not sure what underground workings were permitted as the Sunnyside Mine... Or what workings were owned by Sunnyside in the past, but are now not...

We could change this if you want... We could definitely be more detailed with our mapping and it might be time to start working on showing the vertical connections and stoping where possible. So many ways to look at this.

You can call tomorrow if you want.

Kirstin,

The following emails relate to a letter that we received from Sunnyside regarding the R n B map that was in the Action Memo – and we’ve used in ARSG presentations. It’s one that I thought you created for us (not completely sure) – take a look, but Larry’s comment is below.

Not sure that it’s a big deal. If you agree with his comment, I will look to find a different image / figure or if you have one that we could “correct” the file with that would be great.

Let me know – thanks.

Steve-

We have not reviewed the map or other documents in detail. However, the inaccuracy we are referring to is that the Mogul and Grand Mogul workings are portrayed as Sunnyside Mine workings.

Regards

Larry

Hello Larry,

Thank you for the letter commenting on the planned action at Red and Bonita. I would like to better understand the error you observed on the map depicting the Sunnyside mine workings. If there is an image that you could provide that is more accurate, please feel free to send that to me or otherwise we can discuss this at your convenience.

I look forward to hearing from you in order to correct this information.

Sincerely,

Steve
